Per the Funds' objective, the Defined Distribution Rate is not guaranteed and is shown before fees, which have the result of a lower distribution.

INNOVATORETFS.COM

The funds have characteristics unlike many other traditional investment products and may not be suitable for all investors. For more information regarding whether an investment in the Funds is right for you, please see “Investor Suitability” in the prospectus. Investing involves risks. Loss of principal is possible.

The Funds face numerous market trading risks, including active markets risk, authorized participation concentration risk, buffered loss risk, cap change risk, capped upside return risk, correlation risk, liquidity risk, management risk, market maker risk, market risk, non diversification risk, operation risk, options risk, trading issues risk, upside participation risk and valuation risk. For a detailed list of funds’ risks see the prospectus.

FLEX Options Risk The Funds will utilize FLEX Options issued and guaranteed for settlement by the Options Clearing Corporation (OCC). In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Funds could suffer significant losses. Additionally, FLEX Options may be less liquid than standard options. In a less liquid market for the FLEX Options, the Funds may have difficulty closing out certain FLEX Options positions at desired times and prices. The values of FLEX Options do not increase or decrease at the same rate as the reference asset and may vary due to factors other than the price of reference asset.

The Funds are designed to provide point-to-point exposure to the price return of the reference asset via a basket of Flex Options. As a result, the ETFs are not expected to move directly in line with the reference asset during the interim period.

Investors purchasing shares after an outcome period has begun may experience very different results than funds’ investment objective. Outcome periods are approximately three months beginning on the funds’ inception date. Following the Outcome Period, each successive Outcome Period will begin on the day the prior Outcome Period concludes and will end in three months.

Over each Outcome Period, shareholders will also be subject to U.S. Equity Index losses that are based upon an investment “barrier,” which is an investment strategy whereby a payoff depends on whether an underlying asset has breached a predetermined performance level. The Funds seek to provide a pre-determined barrier at [respectively 10, 20, 30, or 40]% of U.S. Equity Index losses for each Outcome Period (the “Barrier”) by selling FLEX Options that reference the U.S. Equity Index for each Outcome Period (the “Barrier Options”). There is no guarantee that the Fund will be successful in its attempt to implement the Barrier.

Fund shareholders also will be subject to all losses experienced by the U.S. Equity Index if the U.S. Equity Index experiences losses that exceed the Barrier at the end of the Outcome Period. If at the end of the Outcome Period the U.S. Equity Index has experienced a positive price return, or price return losses that are less than the Barrier, the Fund

is designed to provide returns that equal the Distribution Rate. However, if the U.S. Equity Index has decreased in value below the Barrier at the end of the Outcome Period, the Fund’s investments will generate Outcomes that equal the Distribution Rate less the entirety of the U.S. Equity Index’s losses over the course of the Outcome Period. The Fund will not benefit from any increases in the U.S. Equity Index over the course of an Outcome Period but is subject to the possibility of significant losses experienced by the U.S. Equity Index if the value of the U.S. Equity Index drops below the Barrier at the end of the Outcome Period. An investor could lose its entire investment. The Fund will not receive or benefit from any dividend payments made by the constituents of the U.S. Equity Index.

A shareholder may lose its entire investment. In the event an investor purchases Shares after the commencement of the Outcome Period or sells Shares prior to the expiration of the Outcome Period, the Barrier that the Fund seeks to provide may not be available. In addition, the operability of the Barrier is such that the Fund may experience dramatic changes in value of its NAV at the end of the Outcome Period, even if the changes in the U.S. Equity Index are minimal. If the U.S. Equity Index’s value is at or near the Barrier at the end of the Outcome Period, small changes in the value of the U.S. Equity Index could result in dramatic changes in the value of the Barrier Options and therefore the Fund’s NAV. Investors should understand these risks before investing in the Fund.

The Outcomes may only be realized by investors who continuously hold Shares from the commencement of the Outcome Period until its conclusion. Investors who purchase Shares after the Outcome Period has begun or sell Shares prior to the Outcome Period’s conclusion may experience investment returns very different from those that the Fund seeks to provide.

The Funds’ investment objectives, risks, charges and expenses should be considered carefully before investing. The prospectus contains this and other important information, and it may be obtained at innovatoretfs.com. Read it carefully before investing.
