# Innovator Gradient Tactical Rotation Strategy ETF

## OVERVIEW

The Fund seeks to provide long-term capital appreciation with an objective of providing excess returns over the S&P Global Broad Market Index (BMI).

The Fund's strategy seeks to identify the global market segment displaying the strongest price momentum metrics. The strategy utilizes Gradient's rules-based, two-factor approach to create tactical investment opportunities.

## IMPORTANT RISK INFORMATION

Investing involves risks. Loss of principal is possible.

The Fund is actively managed and seeks to provide excess returns over the S&P Global BMI utilizing a rules-based investment process. There can be no assurance that the Fund's investment objectives will be achieved.

The Fund seeks to achieve its investment objective by identifying the global equity market segment that is displaying the strongest price momentum metrics, as described below.

Pursuant to its investment strategy, the Fund will invest in equity securities, which will include direct investments in U.S. and non-U.S. listed common stocks and depositary receipts. The Fund's direct investments in non-U.S. listed securities may be denominated in foreign currency. The Fund may also purchase equity securities of non-U.S. companies that utilize American Depositary Receipts ("ADRs") or Global Depositary Receipts ("GDRs"). Depositary receipts, such as ADRs or GDRs, may be subject to certain of the risks associated with direct investments in the securities of foreign companies, such as currency, political, economic and market risks, because their values depend on the performance of the non-dollar denominated underlying foreign securities.

A momentum style of investing emphasizes investing in securities that have had stronger recent performance compared to other securities, on the basis that these securities will continue to increase

in value. Securities that previously exhibited relatively high momentum characteristics may not experience positive momentum or may experience more volatility than the market as a whole. High momentum may also be a sign that the securities' prices have peaked, and therefore the returns of such securities may be less than the returns of other styles of investing. The performance of the Fund and the Market Segment Indices that represent the global equity market segments the Fund invests in may vary for a variety of reasons. The fund invests in equity securities which may be subject to volatile price fluctuations. Because the fund is non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund, changes in the market value of a single investment could cause greater fluctuations in share price.

*The Fund's investment objectives, risks, charges and expenses should be considered carefully before investing. The prospectus contains this and other important information, and it may be obtained at [www.innovatoretf.com](http://www.innovatoretf.com). Read it carefully before investing.*
