

XDSQ Stands Out

The Innovator U.S. Equity Accelerated ETF - Quarterly (XDSQ) seeks to provide 2x upside of the SPDR S&P 500 ETF Trust, to a cap, over a 3-month outcome period. Over the last 4 quarters, the strategy has delivered noteworthy outperformance over the S&P 500 index—showcasing the value of quarterly acceleration.

XDSQ AND S&P 500 RETURNS BY QUARTER

Source: Bloomberg. Data from 6/30/2022 – 6/30/2023. One cannot invest directly in an index. Index returns do not account for fund fees and expenses. Performance quoted represents past performance, which is no guarantee of future results. Investment returns and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit innovatoretf.com/xdsq for current month-end performance.

The Fund has characteristics unlike many other traditional investment products and may not be suitable for all investors. For more information regarding whether an investment in the Fund is right for you, please see “Investor Suitability” in the prospectus.

Investing involves risks. Loss of principal is possible. The Funds face numerous market trading risks, including active markets risk, authorized participation concentration risk, buffered loss risk, cap change risk, capped upside return risk, correlation risk, liquidity risk, management risk, market maker risk, market risk, non-diversification risk, operation risk, options risk, trading issues risk, upside participation risk and valuation risk. For a detailed list of fund risks see the prospectus.

FLEX Options Risk The Fund will utilize FLEX Options issued and guaranteed for settlement by the Options Clearing Corporation (OCC). In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses. Additionally, FLEX Options may be less liquid than standard options. In a less liquid market for the FLEX Options, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices. The values of FLEX Options do not increase or decrease at the same rate as the reference asset and may vary due to factors other than the price of the reference asset.

These Funds are designed to provide point-to-point exposure to the price return of the Reference Asset via a basket of Flex Options. As a result, the ETFs are not expected to move directly in line with the Reference Asset during the interim period.

Investors purchasing shares after an outcome period has begun may experience very different results than fund's investment objective. Initial outcome periods are approximately one year beginning on the fund's inception date. Following the initial outcome period, each subsequent outcome period will begin on the first day of the month the fund was inception. After the conclusion of an outcome period, another will begin.

Fund shareholders are subject to an upside return cap (the “Cap”) that represents the maximum percentage return an investor can achieve from an investment in the funds for the Outcome Period, before fees and expenses. If the Outcome Period has begun and the Fund has increased in value

to a level near to the Cap, an investor purchasing at that price has little or no ability to achieve gains but remains vulnerable to downside risks. Additionally, the Cap may rise or fall from one Outcome Period to the next. The Cap, and the Fund's position relative to it, should be considered before investing in the Fund. The Fund's website, www.innovatoretfs.com, provides important Fund information as well as information relating to the potential outcomes of an investment in a Fund on a daily basis.

If the Outcome Period has begun and the Fund has experienced an accelerated return, an investor purchasing Shares at that price may be subject to losses that exceed any losses of the Underlying ETF for the remainder of the Outcome Period and may have diminished or no ability to experience further accelerated return, therefore exposing the investor to greater downside risks.

The Fund only seeks to provide shareholders that hold shares for the entire Outcome Period with their respective buffer level against reference asset losses during the Outcome Period. You will bear all reference asset losses exceeding the buffer. Depending upon market conditions at the time of purchase, a shareholder that purchases shares after the Outcome Period has begun may also lose their entire investment. For instance, if the Outcome Period has begun and the Fund has decreased in value beyond the pre-determined buffer, an investor purchasing shares at that price may not benefit from the buffer. Similarly, if the Outcome Period has begun and the Fund has increased in value, an investor purchasing shares at that price may not benefit from the buffer until the Fund's value has decreased to its value at the commencement of the Outcome Period.

The Fund's investment objectives, risks, charges and expenses should be considered carefully before investing. The prospectus contains this and other important information, and it may be obtained at innovatoretfs.com. Read it carefully before investing.
