

Prospectus

Innovator S&P Investment Grade Preferred ETF

(Cboe BZX — EPRF)

February 28, 2025

Innovator S&P Investment Grade Preferred ETF (the “*Fund*”) is a series of Innovator ETFs Trust (the “*Trust*”) and an exchange-traded index fund. The Fund lists and principally trades its shares on Cboe BZX Exchange, Inc. (“*Cboe BZX*” or the “*Exchange*”). Market prices may differ to some degree from the net asset value of shares of the Fund (“*Shares*”). Unlike mutual funds, the Fund issues and redeems Shares at net asset value only in large blocks of Shares called “Creation Units.” The Fund is a series of the Trust and is a passively managed exchange-traded fund organized as a separate series of a registered management investment company.

The U.S. Securities and Exchange Commission (“SEC”) has not approved or disapproved these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

INNOVATOR S&P INVESTMENT GRADE PREFERRED ETF

INVESTMENT OBJECTIVE

The Fund seeks investment results that generally correspond (before fees and expenses) to the price and yield of the S&P U.S. High Quality Preferred Stock Index (the “*Index*”).

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares (“*Shares*”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.47%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.47%

EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell Shares.

	1 Year	3 Years	5 Years	10 Years
Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:	\$48	\$151	\$263	\$591

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it purchases and sells securities (or “turns over” its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the example, may affect the Fund’s performance. During the fiscal year ended October 31, 2024, the Fund’s portfolio turnover rate was 33% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of the Fund’s in-kind creations and redemptions.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 90% of its total assets in the securities that comprise the Index. The Fund, using an indexing investment approach, attempts to replicate, before fees and expenses, the performance of the Index. The Fund’s investment sub-adviser, Penserra Capital Management

LLC (*"Penserra"* or the *"Sub-Adviser"*) seeks a correlation of 0.95 or better (before fees and expenses) between the Fund's performance and the performance of the Index; a figure of 1.00 would represent perfect correlation. S&P Opco LLC (a subsidiary of S&P Dow Jones Indices, LLC) (*"S&P"* or the *"Index Provider"*) compiles, maintains and calculates the Index.

The Index is composed of all preferred stocks that are constituents of the S&P U.S. Investment Grade Preferred Stock Index (the *"Base Index"*). To be eligible for inclusion in the Base Index, a security must be considered "investment grade," which are securities with a credit rating minimum of BBB-/Baa3/BBB- issued by S&P Global Ratings (*"S&P Global"*), Moody's Investors Service, Inc. (*"Moody's"*), and Fitch Ratings, Inc. (*"Fitch"*) respectively. The Index Provider performs the following eligibility screens for quality with respect to credit ratings:

- for an issue rated by all of S&P, Moody's and Fitch, the lowest of the three ratings is used as the issue's credit rating;
- when there are two ratings, the lower of the two ratings must be considered investment grade; and
- when there is only one rating, that rating must be designated in the investment grade category by the applicable rating agency.

While the Index is required to be comprised of securities that are investment grade at the time of investment, the ratings of the securities eligible for inclusion in the Index may be in the lowest tier investment grade rating, which provides for an indication of a higher risk of default than securities that maintain a higher investment grade rating. See *"Credit Ratings Risk"* for further information on the risks associated with credit ratings.

In addition to the credit rating minimum, to be eligible for inclusion in the Index, a preferred security must exhibit minimum liquidity quality characteristics as determined by the Index Provider. With respect to liquidity, a preferred security eligible for inclusion in the Index, a security must be:

- listed on a qualifying U.S. securities exchange;
- have a total market capitalization of greater than or equal to \$100 million and have traded more than 250,000 shares per month over each of the prior six months; and
- maintain a market capitalization of \$75 million and have traded more than 125,000 shares per month over each of the prior six months in order to remain eligible in the Index.

Preferred stocks for which the Index Provider cannot determine an indicated dividend yield are not eligible for inclusion. Once eligible securities have been selected for inclusion in the Index, the Index seeks to mitigate issuer concentration risk by assigning an equal weight to each issuer represented by the selected securities; however, the mitigation of issuer concentration risk is not guaranteed. That weight is then equally distributed among component securities of the issuer that are eligible for the Index. The Index is rebalanced quarterly.

In connection with the Index's methodology to invest in preferred securities, the Index, and therefore the Fund, currently has exposure to preferred securities issued by real estate investment trusts (*"REITs"*). REITs are financial vehicles that pool investors' capital to invest primarily in

income-producing real estate or real estate-related loans or interests. The Index does not limit the types of REITs eligible for inclusion in the Index, which are generally categorized as “Mortgage REITs,” which invest the majority of their assets in real estate mortgages and derive their income primarily from interest payments, “Equity REITs”, which invest the majority of their assets directly in real property and derive their income primarily from rents, royalties and lease payments, and “Hybrid REITs,” which combine the characteristics of both Mortgage REITs and Equity REITs. As of the date of this prospectus, the Fund has exposure to preferred securities issued by Equity REITs.

The Fund is classified as a “diversified company” under the Investment Company Act of 1940, as amended (the “1940 Act”). To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent. As of the date of this prospectus, the Fund is concentrated in the financial sector.

PRINCIPAL RISKS

You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency. There can be no assurance that the Fund’s investment objective will be achieved. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk noted below is considered a principal risk of investing in the Fund, regardless of the order in which it appears. The significance of each risk factor below may change over time and you should review each risk factor carefully.

Concentration Risk. To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. The Fund may be susceptible to loss due to adverse occurrences to the extent that the Fund’s investments are concentrated in a particular issuer or issuers, region, market, industry, group of industries, sector or asset class. As of the date of this prospectus, the Fund is concentrated in the financials sector. For more information regarding the risks of the financials sector, see the “Financials Sector Risk.”

Credit Ratings Risk. The Index invests in securities rated “investment grade” by S&P, Moody’s or Fitch. Using credit ratings to evaluate the creditworthiness of debt securities can involve certain risks. Ratings assigned by the rating agencies are based upon an analysis completed of the issuer’s credit history and ability to pay interest and repay principal. An investment grade rating generally signifies that a credit rating agency considers the current quality of the security to be sufficient to provide reasonable assurance of the issuer’s ability to meet its obligation to security-holders. However, because the Index followed by the Fund permits investments in securities rated in the lowest tier of investment grade ratings, certain of the investment grade preferred securities the Fund invests in may be considered to be “speculative” in nature. Such securities may entail greater price volatility, principal and income risk, and may be subject to greater uncertainty and/or exposure to adverse conditions. In addition, rating agencies typically rely to a large extent on historical data which may not accurately represent present or future circumstances. Ratings do not purport to reflect the risk of fluctuations in market value of the debt security and are not absolute standards of quality and only express the rating agency’s current opinion of an obligor’s overall financial capacity

to pay its financial obligations. A credit rating is not a statement of fact or a recommendation to purchase, sell or hold a debt obligation. Also, credit quality can change suddenly and unexpectedly, and credit ratings may not reflect the issuer's current financial condition or events since the security was last rated. Rating agencies may have a financial interest in generating business, including from the arranger or issuer of the security that normally pays for that rating, and providing a low rating might affect the rating agency's prospects for future business. While rating agencies have policies and procedures to address this potential conflict of interest, there is a risk that these policies will fail to prevent a conflict of interest from impacting the rating.

Cyber Security Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding, but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-adviser, as applicable, or issuers in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. While the Fund has established business continuity plans and risk management systems designed to reduce the risks associated with cyber security, there are inherent limitations in such plans and systems. Additionally, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Financials Sector Risk. Companies in the financial sector, including retail and commercial banks, insurance companies and financial services companies, may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in currency exchange rates, volatile interest rates, decreased liquidity in credit markets and competition from new entrants. Profitability of these companies is largely dependent on the availability and cost of capital and can fluctuate significantly when interest rates change. Credit losses resulting from financial difficulties of borrowers also can negatively impact the sector. These companies are also subject to substantial government regulation and intervention, which may adversely impact the scope of their activities, the prices they can charge, the amount of capital they must maintain, and potentially, their size. The impact of more stringent capital requirements, or recent or future regulation in various countries on any individual financial company or of the financial sector as a whole cannot be predicted. The financial sector is also a target for cyberattacks and may experience technology malfunctions and disruptions.

Index Provider Risk. The Fund seeks to achieve returns that generally correspond, before fees and expenses, to the performance of their Index, as published by the Index Provider. There is no assurance that the Index Provider will compile its Index accurately, select securities in accordance with the Index's methodology properly, or that the Index will be determined, composed, calculated, rebalanced or reconstituted accurately. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any

liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology designed to select quality preferred securities.

Interest Rate Risk. An increase in interest rates may cause the value of securities held by the Fund to decline. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than securities with shorter durations or floating or adjustable interest rates. The negative impact on the Fund from potential interest rate increases could be swift and significant, including falling market values, increased redemptions and reduced liquidity.

Market Risk. The Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. Assets may decline in value due to factors affecting financial markets generally or particular asset classes or industries represented in the markets. The value of assets may also decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or due to factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates will not have the same impact on all types of securities. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors as economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments. The value of Shares may also decline as a result of market conditions. Factors such as inflation, changes in interest rates, changes in regulatory requirements, bank failures, political climate deterioration or developments, armed conflicts, natural disasters or future health crises, may negatively impact market conditions, and cause a decrease in the value of Shares. Other unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy. These events, and any other future events, may adversely affect the prices and liquidity of the Fund's portfolio investments and could result in disruptions in the trading markets.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. Although the Fund currently intends to seek to fully replicate the Index, the Fund may use a representative sampling approach, which may cause the Fund not to be as well-correlated with the return of the Index as would be the case if the Fund purchased all of the securities in the Index in the proportions represented in the Index. In addition, the performance of the Fund and the Index may vary due to asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cost or liquidity constraints.

Passive Investment Risk. The Fund invests in the securities included in the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets, except in connection with the Index's risk reduction mechanism. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.

Preferred Securities Risk. Preferred securities combine some of the characteristics of both common stocks and bonds. Preferred securities are typically subordinated to bonds and other debt securities in a company's capital structure in terms of priority to corporate income, subjecting them to greater credit risk than those debt securities. Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may obtain limited rights. In certain circumstances, an issuer of preferred securities may defer payment on the securities and, in some cases, redeem the securities prior to a specified date. Preferred securities may also be substantially less liquid than other securities, including common stock.

REIT Risk. A REIT is a financial vehicle that pool investors' capital to invest primarily in income-producing real estate or real estate-related loans or interests. The Index includes exposure to preferred securities issued by REITs, and the Fund may invest in preferred securities issued by REITs to the extent such securities are constituents of the Index. REITs are subject to the risk that the real estate market may experience an economic downturn generally, which may have a material effect on the real estate in which the REITs invest and their underlying portfolio securities. REITs are dependent upon the skills of their managers and are not necessarily diversified. REITs are generally dependent upon maintaining cash flows to repay borrowings and to make distributions to preferred shareholders and are subject to the risk of default by lessees or borrowers.

Investments in Equity REITs are subject to the risks associated with directly investing in real estate, which may include, but are not limited to: fluctuations in the value of underlying properties; defaults by borrowers or tenants; market saturation; changes in general and local operating expenses; and other economic, political or regulatory occurrences affecting companies in the real estate sector. Mortgage REITs are additionally affected by the ability of the issuers of its portfolio mortgages to repay their obligations. REITs also are subject to the possibilities of failing to qualify for tax free pass-through of income under the Internal Revenue Code, and failing to maintain their exemption from registration under the 1940 Act. REITs whose underlying assets are concentrated in properties used by a particular industry are also subject to risks associated with such industry. REITs may have also a relatively small market capitalization which may result in their shares experiencing less market liquidity and greater price volatility than larger companies.

Risks Associated with ETFs. The Fund is an ETF, and therefore, as a result of an ETF's structure, is subject to the following risks:

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with orders for the issuance or redemption of Creation Units and no other authorized participant is able to step forward to fulfill the order, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting, and the bid/ask spread (the difference between the price that someone is willing to pay for Shares at a specific point in time versus the price at which someone is willing to sell) on Shares may widen.

Market Maker Risk. If the Fund has lower average daily trading volumes, it may rely on a small number of third party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's NAV and the price at which the Fund's Shares are trading on the Exchange which could result in a decrease in value of the Fund's Shares. In addition, decisions by market makers or APs to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Funds' market price. This reduced effectiveness could result in Fund Shares trading at a discount to NAV and in greater than normal intraday bid-ask spreads for Fund Shares.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. Although the Fund and its investment adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Premium/Discount Risk. Shares trade on the Exchange at market prices rather than their NAV. The market price of Shares generally corresponds to movements in the Fund's NAV as well as the relative supply and demand for Shares on the Exchange. The market price may be at, above (a premium) or below (a discount) the Fund's NAV. Differences in market prices of Shares and the NAV per Share may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the Fund's holdings trading individually or in the aggregate at any point in time. These differences can be especially pronounced during times of market volatility or stress. During these periods, the demand for Shares may decrease considerably and cause the market price of Shares to deviate, and in some cases deviate significantly, from the Fund's NAV and the bid/ask spread on Shares may widen.

Trading Issues Risk. Although Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's NAV. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in the Shares, and APs are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Small- and Mid-Capitalization Company Risk. Small and/or mid capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including limited trading volumes, fewer products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

PERFORMANCE

The bar chart and table below illustrate the annual calendar year returns of the Fund based on NAV as well as the average annual Fund and Index returns. The bar chart and table provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year-to-year and by showing how the Fund's average annual total returns based on NAV compared to those of the Index, a market index and a broad-based market index. The Fund was reorganized on or about October 14, 2021, from Innovator S&P Investment Grade Preferred ETF (the "*Predecessor Fund*"), a series of Innovator ETFs Trust II, into Innovator ETFs Trust, a Delaware statutory trust. The Fund is a continuation of the Predecessor Fund and therefore adopts the performance information of the Predecessor Fund (as shown below). The Fund's performance information is accessible on the Fund's website at www.innovatoretf.com.

The Fund's highest quarterly return was 9.53% (quarter ended March 31, 2019) and the Fund's lowest quarterly return was (8.94)% (quarter ended March 31, 2020).

Average Annual Total Return as of December 31, 2024			
	1 Year	5 Years	Since Inception (5/23/16)
Innovator S&P Investment Grade Preferred ETF			
Return Before Taxes	3.85%	(0.34)%	1.64%
Return After Taxes on Distributions	2.15%	(1.91)%	0.07%
Return After Taxes on Distributions and Sale of Fund Shares	3.05%	(0.59)%	0.93%
S&P 500® Total Return Index (reflects no deduction for fees, expenses or taxes)	25.02%	14.53%	15.05%
S&P U.S. Aggregate Bond Index (reflects no deduction for fees, expenses or taxes)	1.82%	0.06%	1.27%
S&P U.S. High Quality Preferred Stock Index (reflects no deduction for fees, expenses or taxes)	4.09%	(0.02)%	2.08%
S&P U.S. Preferred Stock Index (reflects no deduction for fees, expenses or taxes)	9.20%	2.69%	3.86%

The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Returns before taxes do not reflect the effects of any income or capital gains taxes. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of any state or local tax. Returns after taxes on distributions reflect the taxed return on the payment of dividends and capital gains.

Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here. After-tax returns are not relevant to investors who hold Shares in tax-deferred accounts such as individual retirement accounts (IRAs) or employee-sponsored retirement plans.

MANAGEMENT

Investment Adviser

Innovator Capital Management, LLC (“*Innovator*” or the “*Adviser*”)

Investment Sub-Adviser

Penserra Capital Management LLC

Portfolio Managers

The following persons serve as the portfolio managers of the Fund.

- Dustin Lewellyn, CFA – Chief Investment Officer at Penserra
- Ernesto Tong, CFA – Managing Director at Penserra
- Christine Johanson – Director at Penserra

Each of the portfolio managers is primarily and jointly responsible for the day-to-day management of the Fund and have served in such capacity since April 2018. Ms. Johanson has served in such capacity since August 2024.

PURCHASE AND SALE OF FUND SHARES

The Fund will issue and redeem Shares at NAV only with authorized participants that have entered into agreements with the Fund's distributor and only in Creation Units or multiples thereof ("*Creation Unit Aggregations*"), in exchange for the deposit or delivery of a basket of securities in which the Fund invests. The Fund may issue and redeem Shares in exchange for cash at a later date but has no current intention of doing so. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Individual Shares may only be bought and sold in the secondary market (*i.e.*, on a national securities exchange) through a broker or dealer at a market price. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (at a premium), at NAV, or less than NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling shares in the secondary market (the "bid-ask spread").

Recent information, including information on the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is available online at www.innovatoretfs.com.

TAX INFORMATION

The Fund's distributions will generally be taxable as ordinary income, returns of capital or capital gains. A sale of Shares may result in capital gain or loss.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank), Innovator and Foreside Fund Services, LLC, the Fund's distributor (the "*Distributor*"), may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Additional Information About the Fund's Principal Investment Strategies

The Fund's investment objective may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval upon 60 days' prior written notice. Additionally, the Fund may liquidate and terminate at any time without shareholder approval.

The Fund uses an "indexing" investment approach to attempt to replicate, before fees and expenses, the performance of the Index. The Sub-Adviser seeks correlation over time of 0.95 or better between the Fund's performance and the performance of the Index; a figure of 1.00 would represent perfect correlation. Another means of evaluating the relationship between the returns of the Fund and its Index is to assess the "tracking error" between the two. Tracking error means the variation between the Fund's annual return and the return of the Index, expressed in terms of standard deviation. The Fund seeks to have a tracking error of less than 5%, measured on a monthly basis over a one-year period by taking the standard deviation of the difference in the Fund's returns versus the Index's returns. There is no guarantee that the tracking error will not exceed 5%. The Fund generally invests in all of the securities comprising the Index in proportion to the weightings of the securities in the Index. Under various circumstances, it may not be possible or practicable to purchase all of the securities comprising the Index. In those circumstances, the Fund may purchase a representative sample of securities in the Index.

NON-PRINCIPAL INVESTMENT STRATEGIES

Securities Lending. The Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the Fund receives liquid collateral equal to at least 102% (105% for international securities) of the value of the loaned portfolio securities. This collateral is marked-to-market on a daily basis. To the extent that the Fund receives cash collateral, it will invest such collateral in readily marketable, high quality, short-term obligations.

Fund Investments

Under normal circumstances, the Fund will invest at least 90% of its total assets in the securities that comprise the Index.

PRINCIPAL INVESTMENTS

PREFERRED STOCK

Preferred stock is a class of equity ownership that has a more senior claim to the earnings and assets of a business than common stock. In the event of liquidation, the holders of preferred stock are generally paid before common stockholders, but after secured debt holders. Preferred stock also generally pays a dividend; this payment may be cumulative, in which any delayed prior payments must also be paid before distributions can be made to the holders of common stock. In addition, preferred stock may not pay a dividend, an issuer may suspend payment of dividends on preferred stock at any time, and in certain situations an issuer may call or redeem its preferred stock or convert it to common stock. In the event of liquidation, the holders of preferred stock must be paid off before common stockholders, but after secured debt holders. The preferred stocks in which the Fund invests may pay dividends at a fixed rate; therefore, a preferred stock's market price may be

sensitive to changes in interest rates in a manner similar to bonds — that is, as interest rates rise, the value of the preferred stock is likely to decline. Many preferred stocks also allow holders to convert the preferred stock into common stock of the issuer and therefore the market price of such preferred stocks may be sensitive to changes in the value of the issuer's common stock. In addition, the ability of an issuer of preferred stock to pay dividends may deteriorate or the issuer may default (*i.e.*, fail to make scheduled dividend payments on the preferred stock or scheduled interest payments on other obligations of the issuer), which would negatively affect the value of any such holding. Dividend payments on a preferred stock typically must be declared by the issuer's board of directors. An issuer's board of directors is generally not under any obligation to pay a dividend (even if such dividends have accrued) and may suspend payment of dividends on preferred stock at any time. Preferred stock is also subject to market volatility and the price of preferred stock will fluctuate based on market demand. Preferred stock often has a call feature which allows the issuer to redeem the security at its discretion.

DISCLOSURE OF PORTFOLIO HOLDINGS

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's statement of additional information ("SAI"), which is available at www.innovatoretfs.com.

Additional Risks of Investing in the Fund

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objective. Before you invest, you should consider the following supplemental disclosure pertaining to the Principal Risks set forth above. The risks below are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. The significance of each risk factor below may change over time and you should review each risk factor carefully.

Concentration Risk. In following its methodology, the Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or a sector. To the extent that the Index concentrates in the securities of issuers in a particular industry or sector, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in an industry or sector, the Fund faces more risks than if it were diversified broadly over numerous industries or sectors. Such industry-based risks, any of which may adversely affect the companies in which the Fund invests, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand in a particular industry; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in an industry. In addition, at times, such industry or sector may be out of favor and underperform other industries or the market as a whole.

Credit Ratings Risk. The Index invests in securities rated "investment grade" by S&P, Moody's or Fitch. Using credit ratings to evaluate the creditworthiness of debt securities can involve certain risks. Ratings assigned by the rating agencies are based upon an analysis completed of the issuer's credit history and ability to pay interest and repay principal. An investment grade rating generally signifies that a credit rating agency considers the current quality of the security to be sufficient

to provide reasonable assurance of the issuer's ability to meet its obligation to security-holders. However, because the Index followed by the Fund permits investments in securities rated in the lowest tier of investment grade ratings, certain of the investment grade preferred securities the Fund invests in may be considered to be "speculative" in nature. Such securities may entail greater price volatility, principal and income risk, and may be subject to greater uncertainty and/or exposure to adverse conditions. In addition, rating agencies typically rely to a large extent on historical data which may not accurately represent present or future circumstances. Ratings do not purport to reflect the risk of fluctuations in market value of the debt security and are not absolute standards of quality and only express the rating agency's current opinion of an obligor's overall financial capacity to pay its financial obligations. A credit rating is not a statement of fact or a recommendation to purchase, sell or hold a debt obligation. Also, credit quality can change suddenly and unexpectedly, and credit ratings may not reflect the issuer's current financial condition or events since the security was last rated. Rating agencies may have a financial interest in generating business, including from the arranger or issuer of the security that normally pays for that rating, and providing a low rating might affect the rating agency's prospects for future business. While rating agencies have policies and procedures to address this potential conflict of interest, there is a risk that these policies will fail to prevent a conflict of interest from impacting the rating.

Cyber Security Risk. The Fund, Adviser, Sub-Adviser, APs, services providers, Exchange and investment industry as a whole are susceptible to operational, information security and related "cyber" risks both directly and through their service providers. Similar types of cyber security risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such portfolio companies to lose value. Similarly, cyber security breaches of the Fund's third-party service providers, such as the Adviser, Sub-Adviser, distributor or other service providers (including, but not limited to, index providers, fund accountants, custodians, transfer agents and administrators), market makers, or the issuers of the securities in which the Fund invests, can also subject the Fund to many of the same risks associated with direct cyber security breaches. Such cyber security breaches have the ability to cause disruptions and impact business operations, potentially resulting in: financial loss, interference with the Fund's ability to calculate its NAV, disclosure of confidential trading information, impediments to trading, submission of erroneous trades or erroneous creation or redemption orders, the inability of the Fund or its service providers to transact business, violations of applicable privacy or other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, cyber attacks may render records of Fund assets and transactions, shareholder ownership of Shares, and other data integral to the functioning of the Fund inaccessible or inaccurate or incomplete. Unlike many other types of risks faced by the Fund, these risks typically are not covered by insurance. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). The Fund has established

risk management systems designed to reduce the risks associated with cyber security. However, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers. The Fund and its shareholders could be negatively impacted as a result. The Fund may also incur substantial costs in order to resolve or prevent cyber security incidents in the future.

Financials Sector Risk. Companies in the financial sector, including retail and commercial banks, insurance companies and financial services companies, may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in currency exchange rates, volatile interest rates, decreased liquidity in credit markets and competition from new entrants. Profitability of these companies is largely dependent on the availability and cost of capital and can fluctuate significantly when interest rates change. Credit losses resulting from financial difficulties of borrowers also can negatively impact the sector. Companies in the financial sector are often subject to extensive governmental regulation and intervention, which may adversely affect the scope of their activities, the prices they can charge and the amount of capital they must maintain. Governmental regulation may change frequently and may have significant adverse consequences for companies in the financial sector, including effects not intended by such regulation. The impact of recent or future regulation in various countries on any individual financial company or on the sector as a whole cannot be predicted. Certain risks may impact the value of investments in the financial sector more severely than those of investments outside this sector, including the risks associated with companies that operate with substantial financial leverage. Companies in the financial sector may also be adversely affected by increases in interest rates and loan losses, decreases in the availability of money or asset valuations, credit rating downgrades and adverse conditions in other related markets. Insurance companies, in particular, may be subject to severe price competition and/or rate regulation, which may have an adverse impact on their profitability. The financial sector is particularly sensitive to fluctuations in interest rates. The financial sector has been subject to increased scrutiny by international regulators and future regulations could be imposed that would have an adverse economic impact on financial companies. Recently, the financial sector has been prone to cyberattacks and technology malfunctions and failures, which have caused losses to financial companies.

Index Provider Risk. The Fund seeks to achieve returns that generally correspond, before fees and expenses, to the performance of their Index, as published by the Index Provider. There is no assurance that the Index Provider will compile its Index accurately, select securities in accordance with the Index's methodology properly, or that the Index will be determined, composed, calculated, rebalanced or reconstituted accurately. While the Index Provider gives descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in its indices, and it does not guarantee that its Index will be in line with its methodology designed to select quality preferred securities.

Interest Rate Risk. An increase in interest rates may cause the value of certain fixed income securities held by the Fund to decline. Many factors can cause interest rates to rise, such as central bank monetary policies, inflation rates, general economic conditions and expectations about the foregoing. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than securities with shorter durations or floating or

adjustable interest rates. The negative impact on the Fund from potential interest rate increases could be swift and significant, including falling market values, increased redemptions and reduced liquidity. Substantial shareholder redemptions may worsen this impact. An increase in interest rates could also cause principal payments on a fixed income security to be repaid at a slower rate than expected. This risk is particularly prevalent for a callable debt security where an increase in interest rates could cause the issuer of that security to not redeem the security as anticipated on the call date, effectively lengthening the security's expected maturity, in turn making that security more vulnerable to interest rate risk and reducing its market value.

Market Risk. The securities in the Fund are subject to market fluctuations, and the Fund could lose money due to short-term market movements and over longer periods during market downturns. Assets may decline in value due to factors affecting financial markets generally or particular asset classes or industries represented in the markets. The value of other assets may also decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or due to factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates will not have the same impact on all types of securities. Values of securities may change due to factors such as inflation, changes in interest rates, changes in regulatory requirements, bank failures, political climate deterioration or developments, armed conflicts, natural disasters or future health crises, may negatively impact market conditions, and cause a decrease in the value of securities. Other unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy. These events, and any other future events, may adversely affect the prices and liquidity of the Fund's investments and could result in disruptions in the trading markets. Securities, including the Shares, are subject to market fluctuations and liquidity constraints that may be caused by such factors or other economic, political, or regulatory developments, changes in interest rates, and/or perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a significant negative impact on a Fund and its investments. Such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Such events could result in disruptions to trading markets and could also adversely affect the prices and liquidity of a Fund's holdings. Any of such circumstances could result in increased market volatility and/or have a materially negative impact on the value of Shares or the liquidity of an investment. During any such events, Shares may trade at greater premiums or discounts to their NAV and the bid/ask spread on Shares may widen. The future potential economic impact of any such future events is impossible to predict and could result in adverse market conditions that impact the performance of the Fund.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs operating expenses not applicable to the Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. Although the Fund currently intends to seek to fully replicate the Index, the Fund may use a representative sampling approach, which may cause the Fund not to be as well-correlated with the return of the Index as would be the case if the

Fund purchased all of the securities in the Index in the proportions represented in the Index. In addition, the performance of the Fund and the Index may vary due to asset valuation differences and differences between the Fund's portfolio and the Index resulting from legal restrictions, cost or liquidity constraints.

Passive Investment Risk. The Fund is not actively managed. The Fund invests in securities included in its Index regardless of their investment merit. Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns in excess of the Index. Therefore, it would not necessarily buy or sell a security unless that security is added or removed, respectively, from the Index, even if that security generally is underperforming.

Preferred Securities Risk. Preferred securities combine some of the characteristics of both common stocks and bonds. Preferred securities are typically subordinated to bonds and other debt securities in a company's capital structure in terms of priority to corporate income, subjecting them to greater credit risk than those debt securities. Preferred securities often include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If a Fund owns a preferred security that is deferring its distributions, the Fund may be required to report income for federal income tax purposes although it has not yet received such income in cash. Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may elect a number of directors to the issuer's board of director. Generally, once the issuer pays all the arrearages, the preferred security holders no longer have voting rights. In certain circumstances, an issuer of preferred securities may redeem the securities prior to a specified date. For instance, for certain types of preferred securities, a redemption may be triggered by a change in federal income tax or securities laws or a change in regulatory trademark. As with redemption provisions of debt securities, a special redemption by the issuer may negatively impact the return of the preferred security held by a Fund. Preferred securities may also be substantially less liquid than other securities, including common stock.

REIT Risk. A REIT is a financial vehicle that pool investors' capital to invest primarily in income-producing real estate or real estate-related loans or interests. The Index includes exposure to preferred securities issued by REITs, and the Fund may invest in preferred securities issued by REITs to the extent such securities are constituents of the Index. REITs are subject to the risk that the real estate market may experience an economic downturn generally, which may have a material effect on the real estate in which the REITs invest and their underlying portfolio securities. REITs are dependent upon the skills of their managers and are not necessarily diversified. REITs are generally dependent upon maintaining cash flows to repay borrowings and to make distributions to preferred shareholders and are subject to the risk of default by lessees or borrowers.

Investments in Equity REITs are subject to the risks associated with directly investing in real estate, which may include, but are not limited to: fluctuations in the value of underlying properties; defaults by borrowers or tenants; market saturation; changes in general and local operating expenses; and other economic, political or regulatory occurrences affecting companies in the real estate sector. Mortgage REITs are additionally affected by the ability of the issuers of its portfolio mortgages to repay their obligations. REITs also are subject to the possibilities of failing to qualify for tax free pass-through of income under the Internal Revenue Code, and failing to maintain their

exemption from registration under the 1940 Act. REITs whose underlying assets are concentrated in properties used by a particular industry are also subject to risks associated with such industry. REITs may have also a relatively small market capitalization which may result in their shares experiencing less market liquidity and greater price volatility than larger companies.

Risks Associated with ETFs. The Fund is an ETF, and therefore, as a result of an ETF's structure, is subject to the following risks:

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). Authorized participants are not obligated to make a market in Shares or submit orders for the issuance or redemption of Creation Units. To the extent that authorized participants exit the business or are unable to proceed with orders for the issuance or redemption of Creation Units and no other authorized participant is able to step forward to fulfill the order, Shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts and/or delisting, and the bid/ask spread on Shares may widen.

Market Maker Risk. The Fund faces market trading risks, including the potential lack of an active market for Shares due to a limited number of market makers. If the Fund has lower average daily trading volumes, it may rely on a small number of third-party market makers to provide a market for the purchase and sale of Shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's NAV and the price at which the Shares are trading on the Exchange, which could result in a decrease in market price of the Shares. In addition, decisions by market makers or APs to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Shares trading at a discount to NAV and also in greater than normal intra-day bid-ask spreads for Shares.

Operational Risk. The Fund is exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. Additionally, cyber security failures or breaches of the electronic systems of the Fund and/or its service providers may disrupt or negatively impact the operation of the Fund which may result in financial losses to the Fund and its shareholders. The Fund and its Adviser and Sub-Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address these risks.

Premium/Discount Risk. Shares trade on the Exchange at market prices rather than their NAV. The Fund's NAV represents the value of the Fund's investments and is calculated by taking the sum of the Fund's assets less the Fund's liabilities, if any. The NAV per Share is the value of a Share's portion of all of the Fund's net assets. The market price of Shares generally corresponds to movements in the Fund's NAV as well as the relative supply and demand for Shares on the Exchange. The market price may be at, above (a premium) or below (a discount)

the Fund's NAV. Differences in market prices of Shares and the NAV per Share may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the Fund's holdings trading individually or in the aggregate at any point in time. These differences can be especially pronounced during times of market volatility or stress. During these periods, the demand for Shares may decrease considerably and cause the market price of Shares to deviate, and in some cases deviate significantly, from the Fund's NAV. Additionally, decisions by market makers and/or authorized participants or reduced effectiveness of the arbitrage process in maintaining the relationship of the Fund's NAV to the market price of its Shares could result in the Shares trading at a premium, or discount to NAV and the bid/ask spread on Shares may widen.

Trading Issues Risk. Although Shares are listed for trading on the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained. Shares trade on the Exchange at market prices that may be below, at or above the Fund's NAV. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules. Market makers are under no obligation to make a market in the Shares, and APs are not obligated to submit purchase or redemption orders for Creation Units. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. Initially, due to the small asset size of the Fund, it may have difficulty maintaining its listings on the Exchange.

Security Issuer Risk. Issuer-specific attributes may cause a security held by the Fund to be more volatile than the market generally. The value of an individual security or particular type of security may be more volatile than the market as a whole and may perform differently from the value of the market as a whole.

Small- and Mid-Capitalization Companies Risk. Small- and mid-capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than larger, more established companies as a result of several factors, including narrower markets for their goods and/or services, more limited managerial and financial resources, limited product lines, services, markets, financial resources or are dependent on a small management group. Because these stocks may not be well-known to the investing public, do not have significant institutional ownership, and are followed by relatively few security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, can decrease the value and liquidity of securities of small- and mid-capitalization companies held by the Fund resulting in more volatile performance. Small and/or mid-capitalization companies are typically less stable than larger, more established companies, and may also depend on a small number of essential personnel who may be less experienced than the management of larger companies. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

Management of the Fund

The Fund is a series of Innovator ETFs Trust, an investment company registered under the 1940 Act. The Fund is treated as a separate fund with its own investment objectives and policies. The Trust is organized as a Delaware statutory trust. The Board is responsible for the overall management and direction of the Trust. The Board elects the Trust's officers and approves all significant agreements, including those with the Adviser, Sub-Adviser, custodian and fund administrative and accounting agent.

Investment Adviser

Innovator Capital Management, LLC, 200 W. Front Street, Wheaton, Illinois 60187, serves as the Fund's investment adviser. In its capacity as Adviser to the Fund, Innovator has overall responsibility for selecting and monitoring the Fund's investments and managing the Fund's business affairs. Innovator serves as investment adviser to 150 exchange-traded funds, each of which is organized as a separate series of the Trust, a registered management investment company.

Investment Sub-Adviser

Penserra Capital Management LLC, 4 Orinda Way, Suite 100-A, Orinda, California 94563, serves as the Fund's investment sub-adviser. Penserra has responsibility for managing the Fund's investment program in pursuit of its investment objective.

Portfolio Managers

Dustin Lewellyn, Ernesto Tong and Christine Johanson serve as the Fund's portfolio managers.

- *Dustin Lewellyn, CFA.* Mr. Lewellyn has been Chief Investment Officer with Penserra since 2012. He was President and Founder of Golden Gate Investment Consulting LLC from 2011 through 2015. Prior to that, Mr. Lewellyn was a managing director at Charles Schwab Investment Management, Inc. ("CSIM"), which he joined in 2009, and head of portfolio management for Schwab ETFs. Prior to joining CSIM, he worked for two years as director of ETF product management and development at a major financial institution focused on asset and wealth management. Prior to that, he was a portfolio manager for institutional clients at a financial services firm for three years. In addition, he held roles in portfolio operations and product management at a large asset management firm for more than 6 years.
- *Ernesto Tong, CFA.* Mr. Tong has been a Managing Director with Penserra since 2015. Prior to that, Mr. Tong spent seven years a vice president at Blackrock, where he was a portfolio manager for a number of the iShares ETFs, and prior to that, he spent two years in the firm's index research group.
- *Christine Johanson, CFA.* Ms. Johanson has been a Director with Penserra since 2023. Prior to joining Penserra, Ms. Johanson was a Director on the US Transition Management team at BlackRock from March 2022–March 2023, where she developed custom solutions for institutional investors seeking to restructure portfolios across multiple asset classes.

Ms. Johanson previously served as the global Head of Fixed Income Transition Management for Russell Investments from March 2018–February 2022. Ms. Johanson holds a B.S.B.A. from the University of Missouri and is a CFA Charterholder.

For additional information concerning Innovator and Penserra, including a description of the services provided to the Fund, please see the Fund’s SAI. Additional information regarding the portfolio manager’s compensation, other accounts managed by the portfolio managers and the portfolio managers’ ownership of Shares may also be found in the SAI.

MANAGEMENT FEE

Pursuant to an investment advisory agreement between Innovator and the Trust, on behalf of the Fund (the “*Investment Management Agreement*”), the Fund has agreed to pay an annual management fee to Innovator in an amount equal to 0.47% of its average daily net assets. This management fee is designed to compensate Innovator for the services it provides to the Fund.

Pursuant to an investment sub-advisory agreement between Innovator, Penserra and the Trust, on behalf of the Fund (the “*Investment Sub-Advisory Agreement*”), Innovator has agreed to pay an annual sub-advisory fee to Penserra in an amount based on the Fund’s average daily net assets. Innovator is responsible for paying the entirety of Penserra’s sub-advisory fee. The Fund does not directly pay Penserra.

A discussion regarding the basis for the Board’s approval of the Investment Management Agreement and Investment Sub-Advisory Agreement on behalf of the Fund is available in the Fund’s Form N-CSR for the fiscal year ended October 31, 2024.

Manager of Managers Structure. The Fund and Innovator have received an exemptive order from the SEC to operate under a manager of managers structure that permits Innovator, with the approval of the Board, to appoint and replace sub-advisers, enter into sub-advisory agreements, and materially amend and terminate sub-advisory agreements on behalf of the Fund without shareholder approval (“*Manager of Managers Structure*”). Under the Manager of Managers Structure, Innovator has ultimate responsibility, subject to oversight by the Board, for overseeing the Fund’s sub-advisers and recommending to the Board their hiring, termination, or replacement. The SEC order does not apply to any sub-adviser that is affiliated with the Fund or Innovator.

The Manager of Managers Structure enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approvals for matters relating to any sub-adviser or the sub-advisory agreement. The Manager of Managers Structure does not permit an increase in the advisory fees payable by the Fund without shareholder approval. Shareholders will be notified of any changes made to any sub-adviser or a sub-advisory agreement within 90 days of the change.

ADDITIONAL INFORMATION RELATING TO THE DECLARATION OF TRUST

The Trust’s Agreement and Declaration of Trust (the “*Declaration of Trust*”) provides that by virtue of becoming a shareholder of the Trust, each shareholder is bound by the provisions of the Declaration of Trust. Subject to the provisions of the Declaration of Trust, the Board may, subject to

the requisite vote, engage in and prosecute, defend, compromise, abandon, or adjust, by arbitration, or otherwise, any actions, suits, proceedings, disputes, claims, and demands relating to the Trust. The Board may, in the exercise of their or its good faith business judgment, dismiss any action, suit, proceeding, dispute, claim or demand, derivative or otherwise, brought by a shareholder in its own name or in the name of the Trust. The Declaration of Trust further provides a detailed process for the bringing of derivative actions by shareholders. Prior to bringing a derivative action, a written demand by the complaining shareholder must first be made on the Board to bring the subject action unless an effort to cause the Board to bring such action is excused. A demand on the Board shall only be excused if a majority of the Board a material personal financial interest in the subject action.

There may be questions regarding the enforceability of these provisions based on certain interpretations of the Securities Act of 1933 Act, as amended, the Securities Exchange Act of 1934, as amended and the 1940 Act. However, the Declaration of Trust provides if any provision shall be held invalid or unenforceable in any jurisdiction, such invalidity or unenforceability shall attach only to that provision in such jurisdiction and shall not in any manner affect such provision in any other jurisdiction or any other provision of the Declaration of Trust. The provisions of the Declaration of Trust are not intended to restrict any shareholder rights under the federal securities laws and do not mandate the adjudication of federal securities laws claims through arbitration.

How to Buy and Sell Shares

The Fund issues or redeems its Shares at NAV per Share only in Creation Units. Most investors will buy and sell Shares in secondary market transactions through brokers. Shares will be listed for trading on the secondary market on the Exchange. Shares can be bought and sold throughout the trading day like other publicly traded shares. Share prices are reported in dollars and cents per Share. There is no minimum investment. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. Because Shares trade at market price rather than NAV, an investor may pay more than NAV when purchasing Shares and receive less than NAV when selling Shares.

Authorized participants may acquire Shares directly from the Fund, and authorized participants may tender their Shares for redemption directly to the Fund, at NAV per Share only in Creation Units or Creation Unit Aggregations, and in accordance with the procedures described in the SAI.

BOOK ENTRY

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered

in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or “street name” form.

FUND SHARE TRADING PRICES

The trading prices of Shares on the Exchange is based on market price and may differ from the Fund’s daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund does not impose restrictions on the frequency of purchases and redemptions (*“market timing”*), and has adopted no policies and procedures with respect to market timing activities. In making this determination, the Board considered the risks associated with market timing activities by the Fund’s shareholders, including, dilution, disruption of portfolio management, increases in the Fund’s trading costs and the potential for the realization of capital gains.

Shares may be purchased and redeemed directly from the Fund only when aggregated into one or more Creation Units by authorized participants that have entered into agreements with the Fund’s distributor. The vast majority of trading in Shares occurs on the secondary market and does not involve the Fund directly. Cash trades on the secondary market are unlikely to cause many of the harmful effects of frequent purchases and/or redemptions of Shares detailed above. To the extent the Fund may effect the issuance or redemption of Creation Units in exchange wholly or partially for cash, such trades could result in disruption of portfolio management, dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objectives, and may lead to the realization of capital gains. These consequences may increase as the frequency of cash purchases and redemptions of Creation Units by authorized participants increases. However, direct trading by authorized participants is critical to ensuring that Shares trade at or close to NAV.

To minimize these potential consequences of frequent purchases and redemptions of Shares, the Fund imposes transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs the Fund incurs in effecting trades. In addition, the Fund reserves the right to not accept orders from authorized participants that Innovator has determined may be disruptive to the management of the Fund or otherwise are not in the best interests of the Fund. For these reasons, the Board has not adopted policies and procedures with respect to frequent purchases and redemptions of Shares.

Dividends, Distributions and Taxes

The Fund expects to declare and distribute all of its net investment income and its net realized capital gains, if any, at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund. The amount of any distribution will vary, and there is no guarantee the Fund will

pay either an income dividend or a capital gains distribution. Distributions may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

TAXES

This section summarizes some of the main U.S. federal income tax consequences of owning Shares of the Fund. This section is current as of the date of this prospectus. Tax laws and interpretations change frequently, and this summary does not describe all of the tax consequences to all taxpayers. For example, this summary generally does not describe your situation if you are a corporation, a non-U.S. person, a broker dealer, or other investor with special circumstances. In addition, this section does not describe your state, local or non-U.S. tax consequences.

This federal income tax summary is based in part on the advice of counsel to the Fund. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, counsel to the Fund may not have been asked to review, and may not have reached a conclusion with respect to, the federal income tax treatment of the assets to be included in the Fund. This may not be sufficient for you to use for the purpose of avoiding penalties under federal tax law.

As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

The Fund intends to continue to qualify as a “regulated investment company” under the federal tax laws. If the Fund qualifies as a regulated investment company and distributes its income as required by the tax law, the Fund generally will not pay federal income taxes.

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this prospectus is provided as general information. You should consult your own tax advisor about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

TAXES ON DISTRIBUTIONS

The Fund’s distributions are generally taxable. After the end of each year, you will receive a tax statement that separates the distributions of the Fund into two categories, ordinary income distributions and capital gain dividends. Ordinary income distributions are generally taxed at your ordinary tax rate; however, as further discussed below, certain ordinary income distributions received from the Fund may be taxed at the capital gains tax rates. Some portion of the ordinary income distributions that are attributable to dividends received by the Fund from shares in certain real estate investment trusts may be designated by the Fund as eligible for a deduction for qualified

business income, provided certain holding period requirements are satisfied. Generally, you will treat all capital gain dividends as long-term capital gains regardless of how long you have owned your Shares. To determine your actual tax liability for your capital gain dividends, you must calculate your total net capital gain or loss for the tax year after considering all of your other taxable transactions, as described below. In addition, the Fund may make distributions that represent a return of capital for tax purposes and thus will generally not be taxable to you; however, such distributions may reduce your tax basis in your Shares, which could result in you having to pay higher taxes in the future when Shares are sold, even if you sell the Shares at a loss from your original investment. The tax status of your distributions from the Fund is not affected by whether you reinvest your distributions in additional Shares or receive them in cash. The income from the Fund that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales fee, if any. The tax laws may require you to treat distributions made to you in January as if you had received them on December 31 of the previous year.

Income from the Fund may also be subject to a 3.8% “Medicare tax.” This tax generally applies to your net investment income if your adjusted gross income exceeds certain threshold amounts, which are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals.

A corporation that owns Shares generally will not be entitled to the dividends received deduction with respect to many dividends received from the Fund because the dividends received deduction is generally not available for distributions from regulated investment companies. However, certain ordinary income dividends on Shares that are attributable to qualifying dividends received by the Fund from certain corporations may be reported by the Fund as being eligible for the dividends received deduction.

If you are an individual, the maximum marginal stated federal tax rate for net capital gain is generally 20% (15% or 0% for taxpayers with taxable incomes below certain thresholds). Some capital gains, including some portion of your capital gain dividends, may be taxed at a higher maximum stated tax rate. Capital gain received from assets held for more than one year that is considered “unrecaptured section 1250 gain” (which may be the case, for example, with some capital gains attributable to equity interests in real estate investment trusts that constitute interests in entities treated as real estate investment trusts for federal income tax purposes) is taxed at a maximum marginal stated federal tax rate of 25%. In the case of capital gain dividends, the determination of which portion of the capital gain dividend, if any, is subject to the 25% tax rate, will be made based on rules prescribed by the United States Treasury. Capital gains may also be subject to the Medicare tax described above.

Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Shares to determine your holding period. However, if you receive a capital gain dividend from the Fund and sell your Share at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income. The Code treats certain capital gains as ordinary income in special situations.

An election may be available to you to defer recognition of the gain attributable to a capital gain dividend if you make certain qualifying investments within a limited time. You should talk to your tax advisor about the availability of this deferral election and its requirements.

Ordinary income dividends received by an individual shareholder from a regulated investment company such as the Fund are generally taxed at the same rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualifying dividends received by the Fund itself. Distributions with respect to shares in real estate investment trusts and foreign corporations are qualifying dividends only in limited circumstances. The Fund will provide notice to its shareholders of the amount of any distribution which may be taken into account as a dividend which is eligible for the capital gains tax rates.

TAXES ON EXCHANGE LISTED SHARES

If you sell or redeem your Shares, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your tax basis in your Shares from the amount you receive in the transaction. Your tax basis in your Shares is generally equal to the cost of your Shares, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Shares.

TAXES ON PURCHASES AND REDEMPTIONS OF CREATION UNITS

If you exchange securities for Creation Units you will generally recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and your aggregate basis in the securities surrendered and the cash component paid. If you exchange Creation Units for securities, you will generally recognize a gain or loss equal to the difference between your basis in the Creation Units and the aggregate market value of the securities received and any cash redemption amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units or Creation Units for securities cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position.

TREATMENT OF FUND EXPENSES

Expenses incurred and deducted by the Fund will generally not be treated as income taxable to you.

BACKUP WITHHOLDING

The Fund may be required to withhold U.S. federal income tax (“*backup withholding*”) from dividends and capital gain distributions paid to shareholders. Federal tax will be withheld if (1) the shareholder fails to furnish the Fund with the shareholder’s correct taxpayer identification number or social security number, (2) the IRS notifies the shareholder or the Fund that the shareholder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect, or (3) when required to do so, the shareholder fails to certify to the Fund that

he or she is not subject to backup withholding. The current backup withholding rate is 24%. Any amounts withheld under the backup withholding rules may be credited against the shareholder's U.S. federal income tax liability.

NON-U.S. TAX CREDIT

If the Fund invests in non-U.S. securities, the tax statement that you receive may include an item showing non-U.S. taxes the Fund paid to other countries. In this case, dividends taxed to you will include your share of the taxes the Fund paid to other countries. You may be able to deduct or receive a tax credit for your share of these taxes.

NON-U.S. INVESTORS

If you are a non-U.S. investor (*i.e.*, an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), you should be aware that, generally, subject to applicable tax treaties, distributions from the Fund will generally be characterized as dividends for federal income tax purposes (other than dividends which the Fund properly reports as capital gain dividends) and will be subject to U.S. federal income taxes, including withholding taxes, subject to certain exceptions described below. However, distributions received by a non-U.S. investor from the Fund that are properly reported by the Fund as capital gain dividends may not be subject to U.S. federal income taxes, including withholding taxes, provided that the Fund makes certain elections and certain other conditions are met. Distributions from the Fund that are properly reported by the Fund as an interest-related dividend attributable to certain interest income received by the Fund or as a short-term capital gain dividend attributable to certain net short-term capital gain income received by the Fund may not be subject to U.S. federal income taxes, including withholding taxes when received by certain non-U.S. investors, provided that the Fund makes certain elections and certain other conditions are met. For tax years after December 31, 2022, amounts paid to or recognized by a non-U.S. affiliate that are excluded from tax under the portfolio interest, capital gain dividends, short-term capital gains or tax-exempt interest dividend exceptions or applicable treaties, may be taken into consideration in determining whether a corporation is an "applicable corporation" subject to a 15% minimum tax on adjusted financial statement income.

Distributions to, and gross proceeds from dispositions of shares by, (i) certain non-U.S. financial institutions that have not entered into an agreement with the U.S. Treasury to collect and disclose certain information and are not resident in a jurisdiction that has entered into such an agreement with the U.S. Treasury and (ii) certain other non-U.S. entities that do not provide certain certifications and information about the entity's U.S. owners, may be subject to a U.S. withholding tax of 30%. However, proposed regulations may eliminate the requirement to withhold on payments of gross proceeds from dispositions.

INVESTMENTS IN CERTAIN NON-U.S. CORPORATIONS

If the Fund holds an equity interest in any "passive foreign investment companies" ("PFICs"), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Fund could be subject to U.S. federal income tax and additional interest charges on gains and

certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its shareholders. The Fund will not be able to pass through to its shareholders any credit or deduction for such taxes. The Fund may be able to make an election that could ameliorate these adverse tax consequences. In this case, the Fund would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, the Fund might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax. Dividends paid by PFICs are not treated as qualified dividend income.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local taxes on Fund distributions and sales of Shares.

Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. See “Distributions and Taxes” in the SAI for more information.

Distributor

Foreside Fund Services, LLC serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in the Shares.

Net Asset Value

US Bancorp Fund Services LLC (“*USBFS*”), the Fund’s administrator and fund accounting agent, calculates the Fund’s NAV at the close of regular trading (ordinarily 4:00 p.m. E.S.T.) every day the New York Stock Exchange is open. The NAV for one Share is the value of that Share’s portion of all of the net assets of the Fund, which is calculated by taking the market price of the Fund’s total assets, including any interest or dividends accrued but not yet collected, less all liabilities, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent is the NAV per Share.

Section 2(a)(41) of the 1940 Act provides that when a market quotation is readily available for a fund’s portfolio investments, such investment must be valued at the market value. Rule 2a-5 under the 1940 Act (“*Rule 2a-5*”) defines a readily available market quotation as “a quoted price (unadjusted) in active markets for identical investments that the fund can access at a measurement date, provided that a quotation will not be readily available if it is not reliable.” If a market quotation is not “readily available” the portfolio investment must be fair valued as determined in good faith by a fund’s board of trustees. Rule 2a-5 allows a fund’s board of trustees to designate the fund’s investment adviser as the “valuation designee” to perform fair value determinations subject to certain conditions. In accordance with Rule 2a-5, the Board has appointed Innovator as the “Valuation Designee” for the Fund’s portfolio investments. Investments will be fair valued as determined in good faith in accordance with the policies and procedures established by Innovator as the Valuation Designee pursuant to Rule 2a-5 and approved by, and subject to the oversight of, the Board of Trustees. As a general principle, “fair value” represents a good faith approximation of

the value of a portfolio investment and is the amount the Fund might reasonably expect to receive from the current sale of that investment in an arm's-length transaction. The use of fair value prices may result in prices used by the Fund that may differ from current market quotations or official closing prices on the applicable exchange. A variety of factors may be considered in determining the fair value of such securities. While the Valuation Procedures (defined below) are intended to result in the Fund's NAV calculation that fairly reflects the values as of the time of pricing, the fair value determined for a portfolio instrument may be materially different from the value that could be realized upon the sale of that instrument.

Common stocks, preferred stocks and other equity securities listed on any national or foreign exchange (excluding the NASDAQ National Market ("*NASDAQ*") and the London Stock Exchange Alternative Investment Market ("*AIM*")) will be valued at the last sale price on the exchange on which they are principally traded or, for NASDAQ and AIM securities, the official closing price. Securities traded on more than one securities exchange are valued at the last sale price or official closing price, as applicable, at the close of the exchange representing the principal market for such securities. Securities traded in the over-the-counter market are valued at the mean of the bid and the asked price, if available, and otherwise at their closing bid price.

USBFS may obtain all market quotations used in valuing securities from a third-party pricing service vendor (a "*Pricing Service*"). If no quotation can be obtained from a Pricing Service, then USBFS will contact Innovator. Innovator is responsible for establishing the valuation of portfolio securities and other instruments held by the Fund in accordance with the pricing and valuation procedures adopted by the Board (the "*Valuation Procedures*"). Innovator will then attempt to obtain one or more broker quotes for the security daily and will value the security accordingly.

If no quotation is available from either a Pricing Service, or one or more brokers, or if Innovator has reason to question the reliability or accuracy of a quotation supplied or the use of amortized cost, the value of any portfolio security held by the Fund for which reliable market quotations are not readily available will be determined by Innovator in a manner that most appropriately reflects fair market value of the security on the valuation date. The use of a fair valuation method may be appropriate if, for example: (i) market quotations do not accurately reflect fair value of an investment; (ii) an investment's value has been materially affected by events occurring after the close of the exchange or market on which the investment is principally traded (for example, a foreign exchange or market); (iii) a trading halt closes an exchange or market early; or (iv) other events result in an exchange or market delaying its normal close.

Fair valuation of an equity security will be based on the consideration of all available information, including, but not limited to, the following: (a) the type of security; (b) the size of the holding; (c) the initial cost of the security; (d) transactions in comparable securities; (e) price quotes from dealers and/or pricing services; (f) relationships among various securities; (g) information obtained by contacting the issuer, analysts, or the appropriate stock exchange; (h) an analysis of the issuer's financial statements; and (i) the existence of merger proposals or tender offers that might affect the value of the security.

With respect to any non-U.S. securities held by the Fund, the Fund may take factors influencing specific markets or issuers into consideration in determining the fair value of a non-U.S. security.

For more information about how the Fund's NAV is determined, please see the section in the SAI entitled "Determining Offering Price and Net Asset Value."

Fund Service Providers

US Bancorp Fund Services LLC, doing business as U.S. Bank Global Fund Services, is the administrator and transfer agent for the Trust. U.S. Bank, N.A. serves as the custodian for the Trust.

Chapman and Cutler LLP, 320 South Canal Street, Chicago, Illinois 60606, serves as legal counsel to the Trust.

Cohen & Company, Ltd., 342 North Water Street, Suite 830, Milwaukee, Wisconsin 53202, serves as the Trust's independent registered public accounting firm and is responsible for auditing the annual financial statements of the Trust.

Premium/Discount Information

Information showing the number of days the market price of Shares was greater (at a premium) and less (at a discount) than the Fund's NAV for the most recently completed calendar year, and the most recently completed calendar quarters since that year (or the life of the Fund, if shorter), is available at www.innovatoretfs.com.

Other Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies. Rule 12d1-4 under the 1940 Act provides the requirements under which an investment company may invest in securities of another investment company beyond the limits prescribed in Section 12(d)(1) of the 1940 Act. Any investment by another investment company in the Fund, or by the Fund in another investment company, must comply with Rule 12d1-4 in order to exceed the limits contained in Section 12(d)(1).

Financial Highlights

The financial highlights table is intended to help you understand the Fund's and Predecessor Fund's financial performance. The total returns in the table represent how much an investor would have earned (or lost) on an investment in the Fund and Predecessor Fund (assuming reinvestment of all dividends and distributions). Certain information reflects financial results for a single Fund Share and Predecessor Fund Share. The information below has been audited by Cohen & Company, Ltd., the Trust's independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's Form N-CSR, which is available upon request.
