

## Innovator MSCI Emerging Markets Power Buffer ETF

AS OF JULY 1, 2019

JULY SERIES

### OVERVIEW

The Innovator MSCI Emerging Markets Power Buffer ETF seeks to track the price return of the MSCI Emerging Markets (EM) Index (up to a predetermined cap) while buffering investors against the first 15% of losses over the outcome period before fees and expenses. The ETF can be held indefinitely, resetting at the end of each outcome period (approximately annually).

Innovator Defined Outcome ETFs are the first ETFs that allow investors to take advantage of market growth while maintaining defined levels of buffers against loss.

The Funds have characteristics unlike many other traditional investment products and may not be suitable for all investors. For more information regarding whether an investment in the Fund is right for you, please see “Investor Suitability” in the prospectus.

*The outcomes that the Fund seeks to provide may only be realized if you are holding shares on the first day of the Outcome Period and continue to hold them on the last day of the Outcome Period, approximately one year. There is no guarantee that the Outcomes for an Outcome Period will be realized or that the Fund will achieve its investment objective.*

### DETAILS

Ticker	EJUL
Listing date	July 1, 2019
Exposure	MSCI EM Index (PR) <sup>1</sup>
Cap	9.36%
Buffer level	15.00%
Rebalance frequency	Annual
Expense ratio	0.89%

## MARKET SCENARIOS (1 YEAR)

It is important to note that investors holding units of the ETF for less than the entire holding period will experience different results. Investors purchasing units of the ETF may experience interim period results that deviate from the payoff profile line. However, the outcome at the conclusion of the point-to-point period will be within the parameters of the established payoff profile. Illustrated results do not include fund fees and expenses. Upside participation, downside participation, and buffer levels are fixed for the life of the Fund. The cap level is established at the beginning of each outcome period (approximately annually). The Fund will not consistently track the MSCI EM Index (PR).

<sup>1</sup> The MSCI EM Index (PR) is a broad measure of global emerging markets, and does not include the reinvestment of dividends.

<sup>2</sup> This graph is provided merely to illustrate the outcomes that the Fund seeks to provide based upon the price performance of the MSCI EM Index. The Fund may experience losses greater than 85%.

## HOLDINGS

Starting MXEF Level: 1052.90

Position	Strike	Expiration
MSCI EM Index Purchased Call Option	631.74	6/30/2020

MSCI EM Index Sold Call Option	1151.45	6/30/2020

Subject to change.

## DEFINED OUTCOME PROCESS

POWERED BY: Milliman MSCI

LISTED ON: NYSE

**The Funds have characteristics unlike many other traditional investment products and may not be suitable for all investors. For more information regarding whether an investment in the Fund is right for you, please see “Investor Suitability” in the prospectus.**

The ETFs referred to herein is not sponsored, endorsed, or promoted by MSCI Inc. or based upon the MSCI EAFE and MSCI Emerging Markets Indexes. MSCI Inc. bears no liability with respect to the ETFs. MSCI, MSCI EAFE, and MSCI Emerging Markets are trademarks or service marks of MSCI Inc. or its affiliates (“Marks”) and are used hereto subject to license from MSCI. All goodwill and use of Marks inures to the benefit of MSCI and its affiliates. No other use of the Marks is permitted without a license from MSCI.

**Investing involves risks.** Loss of principal is possible. The Funds face numerous market trading risks, including active markets risk, authorized participation concentration risk, buffered loss risk, cap change risk, capped upside return risk, correlation risk, liquidity risk, management risk, market maker risk, market risk, non-diversification risk, operation risk, options risk, trading issues risk, upside participation risk and valuation risk. For a detail list of fund risks see the prospectus.

Non-U.S. securities and Emerging Markets are subject to higher volatility than securities of domestic issuers due to possible adverse political, social or economic developments, restrictions on foreign investment or exchange of securities, lack of liquidity, currency exchange rates, excessive taxation, government seizure of assets, different legal or accounting standards, and less government supervision and regulation of securities exchanges in foreign countries.

**FLEX Options Risk.** The Fund will utilize FLEX Options issued and guaranteed for settlement by the OCC. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses. Additionally, FLEX Options may be less liquid than standard options. In a less liquid market for the FLEX Options, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices. The values of FLEX Options do not increase or decrease at the same rate as the reference asset and may vary due to factors other than the price of reference asset.

These Funds are designed to provide point-to-point exposure to the price return of the Index via a basket of Flex Options. As a result, the ETFs are not expected to move directly in line with the Index during the interim period.

Investors purchasing shares after an outcome period has begun may experience very different results than funds’ investment objective. Initial outcome periods are approximately 1-year beginning on the funds’ inception date. Following the initial outcome period, each subsequent outcome period will begin on the first day of the month the fund was accepted. After the conclusion of an outcome period, another will begin.

**Fund shareholders are subject to an upside return cap (the “Cap”) that represents the maximum percentage return an investor can achieve from an investment in the funds’ for the Outcome Period, before fees and expenses. If the Outcome Period has begun and the Fund has increased in value to a level near to the Cap, an investor purchasing at that price has little or no ability to achieve gains but remains vulnerable to downside risks. Additionally, the Cap may rise or fall from one Outcome Period to the next. The Cap, and the Fund’s position relative to it, should be considered before investing in the Fund. The Funds’ website, [www.innovatoretfs.com](http://www.innovatoretfs.com), provides important Fund information as well information relating to the potential outcomes of an investment in a Fund on a daily basis.**

**The Funds only seek to provide shareholders that hold shares for the entire Outcome Period with their respective buffer level against Index losses during the Outcome Period. You will bear all Index losses exceeding 9, 15 or 30%. Depending upon market conditions at the time of purchase, a shareholder that purchases shares after the Outcome Period has begun may also lose their entire investment. For instance, if the Outcome Period has begun and the Fund has decreased in value beyond the pre-determined buffer, an investor purchasing shares at that price may not benefit from the buffer. Similarly, if the Outcome Period has begun and the Fund has increased in value, an investor purchasing shares at that price may not benefit from the buffer until the Fund’s value has decreased to its value at the commencement of the Outcome Period.**

*The Funds’ investment objectives, risks, charges and expenses should be considered before investing. The prospectus contains this and other important information, and it may be obtained at [innovatoretfs.com](http://innovatoretfs.com). Read it carefully before investing.*
