

Innovator Defined Wealth Shield ETF™

QUARTERLY SERIES

OVERVIEW

The Innovator Defined Wealth Shield ETF™ seeks to track the return of the SPDR S&P 500 ETF Trust (SPY), to a cap, and provide a measure of downside protection by seeking to buffer investors against losses. The ETF targets a 20% buffer every 3-month outcome period. The ETF can be held indefinitely, resetting at the end of each outcome period.

Innovator Defined Outcome ETFs are the first ETFs that allow investors to take advantage of market growth while maintaining defined levels of buffers against loss. The ETFs are as tax-efficient as traditional ETFs due to a recent rule change allowing the in-kind trading of options.

Although the ETF targets a 20% buffer, it may fall into a range of 15-20%; there is no guarantee that the buffer will be within this range or that the Fund will provide the buffer.

The Funds have characteristics unlike many other traditional investment products and may not be suitable for all investors. For more information regarding whether an investment in the Fund is right for you, please see "Investor Suitability" in the prospectus.

The outcomes that the Fund seeks to provide may only be realized if you are holding shares on the first day of the Outcome Period and continue to hold them on the last day of the Outcome Period, approximately one quarter. There is no guarantee that the Outcomes for an Outcome Period will be realized or that the Fund will achieve its investment objective.

DETAILS

Ticker	BALT
Listing date	July 1, 2021
Exposure	SPY
Starting cap (quarterly)	2.73%
Starting buffer (quarterly)	20%
Outcome period	7/1/2024 - 9/30/2024
Rebalance frequency	Quarterly
Expense ratio	0.69%
Net assets	\$624.05M
Exchange	Cboe BZX
Series	Quarterly

KEY POINTS

- » Defined downside buffer levels
- » Exposure to S&P 500 via the SPY's upside performance (to a cap)
- » Cost effective, flexible, liquid, and transparent
- » Tax-efficient[†]
- » No credit risk[†]
- » Rebalances quarterly and can be held indefinitely

PAYOFF PROFILE (ONE QUARTER)

- SPY
- Innovator Defined Wealth Shield ETF™

For information purposes only. Does not represent actual fund performance. Intended to illustrate the return profile the investment objective seeks to achieve relative to SPY. Illustration does not account for fund fees and expenses.

PERFORMANCE

	YTD	1yr	3yr	5yr	10yr	Inception
ETF NAV	5.24%	7.78%	5.35%	-	-	5.35%
ETF Market Price	5.11%	7.67%	5.34%	-	-	5.34%
S&P 500 Price Return Index ¹	14.48%	22.70%	8.31%	-	-	8.31%

Data as of 6/30/2024. The fund inception on 6/30/2021. Performance quoted represents past performance, which is no guarantee of future results. Investment returns and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit innovatoretfs.com/define for current month-end performance. One cannot invest directly in an index. Index returns do not represent the returns of the underlying reference asset and do not account for fund fees and expenses.

ANALYSIS

	St. Dev.	Beta	Sharpe
ETF	3.11%	0.14	0.73
S&P 500 Price Return Index ¹	17.18%	1	0.31

Data as of 6/30/2024. Since inception.

MARKET SCENARIOS (ONE QUARTER)

- SPY
- Innovator Defined Wealth Shield ETF™

It is important to note that investors holding units of the ETF for less than the entire holding period will experience different results. Investors purchasing units of the ETF may experience interim period results that deviate from the payoff profile line. However, the outcome at the conclusion of the point-to-point period will be within the parameters of the established payoff profile. Illustrated results do not include fund fees and expenses. Upside participation, downside participation, and buffer levels are fixed for the life of the Fund. The cap level is established at the beginning of each outcome period (approximately quarterly). The Fund will not consistently track SPY.

¹ The S&P 500 Price Return Index is a broad measure of U.S. large cap stocks, and does not include the reinvestment of dividends.

Standard Deviation is a statistical measure of the dispersion of returns for a given security or market index relative to its mean. **Beta** is a measure of the volatility of an individual stock in comparison to the unsystematic risk of the entire market. **Sharpe ratio** is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

HOLDINGS

Starting SPY Index Level: 544.22

Position	Strike	Expiration
SPY Purchased Call Option	1.36	9/30/2024
SPY Sold Put Option	435.38	9/30/2024
SPY Purchased Put Option	544.22	9/30/2024
SPY Sold Call Option	559.08	9/30/2024

Subject to change.

DEFINED OUTCOME PROCESS

Set market exposure

✓ **SPY**

Set buffer level

✓ **20%**

Set outcome period

✓ **APPROX. 3 MONTHS**

Construct basket to match index exposure, buffer level, and term.

✓ **FLEX OPTIONS**
(Flexible EXchange®)

Determine maximum growth opportunity (cap)

✓ **2.73%**

At the end of the outcome period, the Fund will roll into a new set of options contracts with the same exposure and term; and a new buffer and cap will be determined.

POWERED BY:

†ETFs use creation units, which allow for the purchase and sale of assets in the fund collectively. Consequently, ETFs usually generate fewer capital gain distributions overall, which can make them somewhat more tax-efficient than mutual funds. Defined Outcome ETFs are not backed by the faith and credit of an issuing institution, so they are not exposed to credit risk.

In seeking to provide a significant measure of downside protection on a quarterly basis, the options-based strategy underpinning BALT will likely offer investors an upside cap that is substantially lower than equity Buffer ETFs™ that operate over an annual outcome period.

Investing involves risks. Loss of principal is possible. The Funds face numerous market trading risks, including active markets risk, authorized participation concentration risk, buffered loss risk, cap change risk, capped upside return risk, correlation risk, liquidity risk, management risk, market maker risk, market risk, non-diversification risk, operation risk, options risk, trading issues risk, upside participation risk and valuation risk. For a detail list of fund risks see the prospectus.

FLEX Options Risk. The Fund will utilize FLEX Options issued and guaranteed for settlement by the Options Clearing Corporation (OCC). In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses. Additionally, FLEX Options may be less liquid than standard options. In a less liquid market for the FLEX Options, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices. The values of FLEX Options do not increase or decrease at the same rate as the reference asset and may vary due to factors other than the price of reference asset.

Shares are bought and sold at market price, not net asset value (NAV), and are not individually redeemable from the fund. NAV represents the value of each share's portion of the fund's underlying assets and cash at the end of the trading day. Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where fund shares are listed

Investors purchasing shares after an outcome period has begun may experience very different results than funds' investment objective. Initial outcome periods are approximately one quarter beginning on the funds' inception date. Following the initial outcome period, each subsequent outcome period will begin on the first day of the month the fund was accepted. After the conclusion of an outcome period, another will begin.

Fund shareholders are subject to an upside return cap (the "Cap") that represents the maximum percentage return an investor can achieve from an investment in the funds' for the Outcome Period, before fees and expenses. If the Outcome Period has begun and the Fund has increased in value to a level near to the Cap, an investor purchasing at that price has little or no ability to achieve gains but remains vulnerable to downside risks. Additionally, the Cap may rise or fall from one Outcome Period to the next. The Cap, and the Fund's position relative to it, should be considered before investing in the Fund. The Funds' website, www.innovatoretfs.com, provides important Fund information as well information relating to the potential outcomes of an investment in a Fund on a daily basis.

The Funds only seek to provide shareholders that hold shares for the entire Outcome Period with their respective buffer level against losses of the SPY during the Outcome Period. You will bear all reference asset losses exceeding the buffer. Depending upon market conditions at the time of purchase, a shareholder that purchases shares after the Outcome Period has begun may also lose their entire investment. For instance, if the Outcome Period has begun and the Fund has decreased in value beyond the pre-determined buffer, an investor purchasing shares at that price may not benefit from the buffer. Similarly, if the Outcome Period has begun and the Fund has increased in value, an investor purchasing shares at that price may not benefit from the buffer until the Fund's value has decreased to its value at the commencement of the Outcome Period.

The Funds' investment objectives, risks, charges and expenses should be considered carefully before investing. The prospectus and summary prospectus contains this and other important information, and it may be obtained at innovatoretfs.com. Read it carefully before investing.
