## WHAT WERE THE FUND COSTS FOR THE PAST YEAR?\* (based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Innovator Equity Defined Protection ETF - 1 Yr November	\$0	0.79%

\* Expense ratio is annualized. Amount shown reflects the expenses of the Fund for the current reporting period.

## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

The Fund seeks to match the price returns of the SPDR S&P 500 ETF Trust (SPY) up to a stated upside Cap, while limiting downside losses to SPY by the amount of its stated Buffer over the course of the Outcome Period. Because the period contemplated herein does not align with the Outcome Period of the Fund, the Fund’s performance stated over the period covered by this report does not reflect the implementation of the Fund’s investment strategy for the full Outcome Period.

In markets where the S&P 500 Index is down, the risk mitigation attributes of the stated Buffer provide an opportunity for the Fund to soften market losses during the reporting period and outperform the S&P 500 Index. Alternatively, in markets where the S&P 500 Index is appreciating, the risk mitigation attributes of the Buffer may limit the upside performance over the reporting period by virtue of the Fund’s Cap, which limits the amount of potential Fund gains and represents the absolute maximum return that the Fund can achieve for its Outcome Period. The effect of the Cap and the Buffer will also cause the Fund to experience different returns than SPY.

The S&P 500 Index delivered strong performance for the year ended October 31, 2024. Gains were primarily driven by the continued strength in technology and growing market enthusiasm for artificial intelligence, alongside optimism surrounding a potential soft landing for the economy. While market breadth improved in the latter part of the year, it remained relatively narrow overall.
